Company Overview

GLG Life Tech Corporation ("GLG") is the world's leading provider of high-grade stevia, a natural, zero-calorie sweetener. The company's vertically integrated operations include seed development and breeding, propagation, harvesting, processing and refining. On December 11, 2007, the Company's shares began trading on the TSX main board and ceased trading on the CNQ.

Quick Facts

- Growing global demand for natural sweeteners
- Fully integrated stevia operations with proprietary seedling and refining technologies

- Strategic multi-decade supply agreement signed with Cargill; GLG to supply 80% of Cargill's global stevia requirements, GLG also to hold 100% exclusivity to supply Cargill with all stevia sourced from China
- Long-term exclusive harvesting and refining agreements in the three largest growing areas in China
- Experienced international management team and Board of Directors with significant ownership

About Stevia

- Scientific plant name: *stevia rebaudiana bertonii*
- Ingredient name: *rebiana*
- Native to Paraguay and used to sweeten food and beverages for more than 200 years
- Zero calories and 100% natural
- Heat stable; suitable for a number of food and beverage applications
- 200 to 300 times sweeter than sugar on a per unit basis
- Zero glycemic index; safe for diabetics
- Shown in studies to prevent cavities and reduce high blood pressure and hypertension
- U.S. FDA recently issued a letter of no objection to the use of *rebiana* high grade stevia extract in food and beverages
- Also used as a food additive in many countries including Australia, New Zealand, China, Japan, Korea, Thailand, Malaysia, Israel, Brazil, Uruguay and Paraguay

Recent Developments

- June 2009** \$42 million secured in additional credit facilities
- May 2009** US\$40.5 million order received from Cargill for TRUVIA™; New customer Zevia relaunches beverage line with GLG rebiana stevia extract, first cola to U.S. market

Company breaks ground on new rebiana (RA97) refining facility in Qingdao, China; 1,000 MT phase one completion expected by December 2009
- Jan 2009** GLG begins operations at two new leaf processing facilities; total estimated throughput capacity to reach 41,000 metric tons per annum

Company announces six new proprietary stevia seed strains with Rebaudioside A content levels reaching in excess of 70% in the raw leaf
- Dec 2008** U.S. market opened as FDA issues letter of no objection to the use of high grade stevia extract in food and beverages

- Sep 2008** Agreement signed to establish *GLG-Weider Sweet Naturals*, a venture company focused on the marketing and sale of high grade stevia to global food and beverage companies
- Aug 2008** Cargill exercises 1,494,429 in warrants at an exercise price of \$3.50; proceeds of \$5,230,500 to GLG
- July 2008** Cargill provides US\$20M financing to GLG; Credit lines secured in China for US\$36.7M
- May 2008** New agreement signed with Cargill; GLG to provide 80% of Cargill's global stevia requirements and to be its exclusive supplier for China; LOI signed for joint venture with Weider Global Nutrition
- Apr 2008** GLG announces 20-year exclusive agreement for stevia growth and production in Juancheng, China

Market Potential

There are multiple market opportunities for stevia:

- Global sweetener market value is estimated at \$45-50 billion per annum with a \$13 billion U.S. market
- Healthy foods is the key driver of food and beverage sector growth and offers significant pricing power
- Consumers are searching for healthy and safe alternatives to reduce caloric intake
- Obesity, diabetes and a number of related health problems have led to higher healthcare costs
- Approximately 127 million adults, or 64.5% of individuals aged 20 years and older, in the US are overweight
- 3 out of 5 Americans believe artificial sweeteners are only somewhat safe or not safe at all; natural alternative is needed
- U.S. market recently opened to the use of stevia in food and beverages; demand expected to significantly increase
